Partner search from Poland

European Programme	Erasmus+, Multilateral School Partnerships
About us	We are a primary school in Poznań with 500 pupils from the age of 6 to 12 years old. This school year, we became a partner in a Swiss project 'Preventing Overweight and Obesity', that aims at preventing overweight and obesity through wide-spread educational measures on nutrition and physical activity, as well as through intervention activities among overweight children. Next year, we would like to start a new project that will create an opportunity for our students to find new ways of physical activities and help them to stay fit and healthy.
About our project idea	The project "Let's play together-right now!" will have three main aims. Firstly, we want to encourage our students to find out how their grandparents and parents spent free time and what games they played when there was no television, computers and a play station. We would like to play these games together. What will our students think about them? Will they be willing to spend their time this way? We hope so, because the second aim of our project is to share this knowledge with children from other countries. This time students will use modern technology, computers and the Internet to teach others. That leads us to the final aim of our project: an international tournament for our students. Let's play together the games from the past!
Partners searched	We are looking for a primary partner school and we would like to invite you to work on this project with us.
Project period	Deadline for application submission: 1st half of 2014 Beginning of the project with our partner: from September 2014
